The Prep students this term have been learning about Toys: how they are made, materials used and how they work. The students had an opportunity to take part in a workshop in making their own hand puppets. All the students were engaged and excited during this session.
We are fortunate to have Stephanie who is such a talented parent at our school. Stephanie organised and ran the whole day session with our Preps. We are so grateful for the time and effort she put into creating a fun day for all of our students and teachers.
We hope you enjoy looking at our photos as much as our Preps loved making them!
