Hot Air Balloon Buddy Activity

Grade Preps, 1’s and 2’s buddies got together last Thursday to make HOT AIR BALLOONS! This activity required students to listen, think, process information received, follow instructions, develop and strengthen their fine motor skills such as cutting neatly along the lines, colouring in, weaving in the strips of paper and choosing appropriate background pictures.

It was an enriching experience for all our students as they worked in small groups of about 4-5 students across the three grades. It was amazing to see how group members helped each other to accomplish the task. Friendships developed and students got to know people in their groups.

It was a fabulous activity and the end result was spectacular!
