This week the students in Prep have been focusing in learning the letter ‘Pp,’ the sound it makes and words that start with this letter. To reinforce this learning the Preps took part in a fun activity in making popcorn. This also incorporated science focusing on change of state. The students brainstormed how corn pops, the ingredients and cooking utensils required. We hope you enjoy looking at these photos as our students enjoyed watching the change occur in front of them!!

**Ingredients**

- Corn x4 packets
- Oil x 5 table spoons each cooking time

**Cooking Utensils**

- Electric frying pan
- Ladle

**Extra**

- paper cones: purple and pink
Method

1. Pour 5 tablespoons of oil in the frying pan.
2. When the oil is hot we add some corn in the frying pan.

3. Place the glass lid on top of the frying pan (so the popcorn doesn't go everywhere).
4. Watch the corn heat up and turn into popcorn.

5. Scoop the popcorn with the ladle and place them in the paper cones.

6. Enjoy eating them, YUM...!!
