This term the Grade 3/4’s have been learning about ‘Flight’. The students have been learning about the aerodynamics and theory of flight, objects that fly and the history of flight. Throughout this topic, students made models and presented projects to their classes which was then followed by an excursion to The Moorabbin Airport. At the Moorabbin Airport, all the grade 3/4’s were able to see old planes and helicopters and had an opportunity to go inside the cockpit.

All the students had a fantastic day showing their knowledge and learning much more!!!
