Our buddy program has started again in Term 3, the grade 5/6 students are mentoring the 1/2 students in a new topic——— RECYCLING. Our focus is to educate the students about the importance of recycling, how it can affect the environment and most importantly our school.

Students emptied bins from around the school and sorted them into 3 groups:

- Green waste (fruit scraps)
- Recycling (paper and cardboard)
- General waste (glad wrap, chip packets and wrappers).
