Cybersafety Peer Lesson!

At Southern Cross Primary School, we as a community, have been focussing on ‘Internet Safety and How to Stay Safe whilst being on the Internet’. We have incorporated peer-taught lessons where grade 5/6 TRIBE’s leaders teach the younger students, under the supervision of teachers, on how to stay safe when using different technology devices and why we have to keep safe. Throughout this short curriculum students watched video clips of ‘Hectors World’ and made ‘Snail Mail Boxes’ which are placed around the school in different classrooms. These boxes will be used for students to communicate with teachers if they are either having trouble using computers or are experiencing any sort of cyberbullying. All students thoroughly enjoyed these peer-taught lessons and are still using the information that was learnt during this curriculum.
